

JLG Forklift Part

JLG Forklift Part - In the late 1960's John L. Grove, with his wife Cora set out on a cross country voyage in their RV. Recently retired, after spending numerous years working with his brother to assemble their crane company into an market leader, John had no idea that important trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling technologies was the end result of a road trip.

All through their trip, John reacquainted himself with former business connections along the way. In combination with these conversations and a significant event; two workers had been tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered an infinite market for a product that could promptly and safely elevate people in the air to accomplish upkeep and other building services.

Upon returning from their travels, John formed a partnership with two friends and acquired a metal fabricating business in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty employees, they designed and sold the first JLG aerial work platform. The business incorporates some of the simple design elements of that original lift into existing versions.

Since then, JLG Forklifts have come a long way from when Mr. John L. Grove returned from his fatefull cross-country trip and since the first JLG aerial platform entered the marketplace. As of today, the company has expanded itself into several global markets and continues to develop new machinery to guarantee that customers are able to become safer and more well-organized within their workplace.
